The WCTRS Recommendations  
on COVID-19 Policy Decisions

Regarding the World Conference on Transport Research Society (WCTRS), the Japan Transport and Tourism Research Institute (JTTRI) has been collaborating with the Conference, for example, dispatching researchers to its international conferences. We would like to inform you the WCTRS ‘Recommendations on COVID-19 Policy Decisions’, which was provided us by the WCTRS.

In this Recommendations, recognizing that transportation and logistics play an important role in revitalizing depressed economic activities after the end of pandemic of COVID-19, six items are proposed regarding the role that policy makers should play especially in terms of financial and monetary support. This is a very suggestive recommendation for considering future policies in the transportation and logistics sectors. So, please read the attached Recommendation.

Sincerely,
