

Profile(Presentation)

Masai Muto, Senior Research Fellow, Japan Transport and Tourism Research Institute (JTTRI)

Masai MUTO completed the Tokyo University of Science of Master's Course department of Civil Engineering in 1989. Same year, he joined Railway Technical Research Institute. After engaging in the R & D of Superconducting Maglev Train System, he held the Laboratory Head of Transport Planning in 2005, and the General Manager of Strategic Research Division in 2013. He has been appointed JTTRI Senior Research Fellow since 2019. He has been engaged in research on transportation planning (railway) for many years. In 2001, he received a Ph.D. from Tokyo University of Science and served as a visiting professor at the university from 2013 to 2018. In addition to his other duty, he has also been a part-time lecturer at Keio University from 2010 to 2019.
